

OnGuardian for Communities is a centralized management platform built to support Community Based Organizations in delivering value added services with a focus on improving the Social Determinants of Health (SDOH) of community members.

Community leaders can leverage curated content, social engagement, and activities that address the wellbeing of seniors together with an innovative interface that is simple and easy to use.

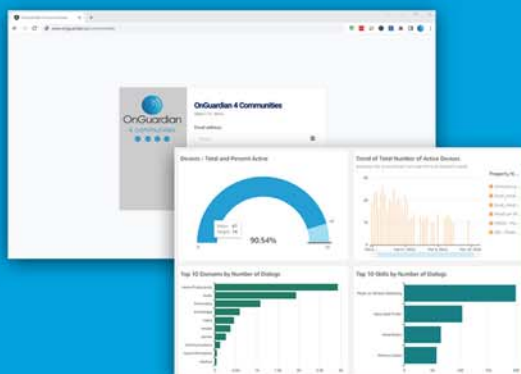

Our platform is driven by Alexa Smart Properties to provide efficient collaboration and communications between seniors, social workers, caregivers, and community leaders to reduce social isolation and improve the well-being of seniors.
